Summary:

Senior Frontend Engineer with 5+ years building scalable web applications. Expertise in React, TypeScript, Micro Frontends, and GraphQL - led platform modernization and content authoring systems improving authoring efficiency by 50%.

Skills:

- **Frontend Development:** React, Next.js, TypeScript, JavaScript, GraphQL, Apollo Client, Module Federation, Micro Frontends, Zustand, Redux Toolkit, Tailwind CSS, Localization (i18n), RTL Support
- **Backend Development:** Node.js, Express.js, MongoDB, Java, Spring Boot, Python, Contentful, Cloudinary
- **Testing & Tooling:** Jest, React Testing Library, Rollup, Rspack, Git

Work Experience:

Frontend Engineer L3 | [Alef Education](#) | UAE (Remote)

March 2025 - Present

- Led migration of the **learning player** to a **Micro Frontend** architecture (React, TypeScript, Module Federation) and designed the **editor** app's MFE architecture, enabling independent deployment across teacher and student platforms..
- Led cross-team collaboration to integrate the learning player and related platform features across teacher and student journeys, proactively driving alignment, resolving dependencies, and ensuring seamless end-to-end user experiences.
- Played a key role in developing the content authoring/editor platform, enabling curriculum authors to create, configure, and manage interactive learning content, contributing to a **50% improvement in authoring efficiency**.
- Designed and implemented **advanced authoring capabilities on top of a TipTap-based editor**, including dynamic variables, fill-in-the-blank generation, dependency management, and content validation workflows for interactive learning experiences.
- Built a **slide-based learning player** rendering interactive widgets (MCQ, fill-in-the-blanks, matching, readers with highlights & notes) with progress tracking, state persistence, resume, and full RTL/Arabic localization
- Designed and implemented a widget communication and event framework to synchronize state and interactions between editor and player environments.
- Integrated GraphQL APIs using Apollo Client and improved platform performance through optimized state management (Zustand), rendering strategies, reusable abstractions, custom hooks, asset pickers, and shared UI components that accelerated development across multiple projects.

Senior Software Engineer | Cimpres ([Vista](#)) | Mumbai (Remote), India

July 2023 - March 2025

- Designed and developed reusable Smart Component libraries distributed as npm packages, **reducing frontend implementation effort by 90%** and driving consistency across multiple micro-frontends.
- Developed 3 Contentful Apps, streamlining content authoring and reducing errors by **50%** with preview options.
- Built and automated an end-to-end product feed pipeline for social media integrations, eliminating errors from stale data.
- Developed the Data Resolvers and Resolver Gatsby Plugins as npm packages, which are used by different MFEs to get the resolved data which can then be passed to our Smart Components.

Software Engineer | Graphy By Unacademy | Bangalore (Remote), India

May 2022 - June 2023

- Improved Lighthouse Score for [NextLevel](#), boosting SEO by **10%** and performance by **15%** for public pages. Enhanced mobile responsiveness and optimized public pages like Job Details and User Profile.
- Contributed to **25+** features for Graphy Repo, launched on [Product Hunt's](#) top 10 products. Enhanced UI/UX with visualizations, resulting in **10x** increase in viewers and engagement from 75 to 755 viewers per day. Implemented SEO optimization for **87%** organic traffic boost. Shipped 10+ features for Graphy Link (1:1 meeting scheduler), including Zoom integration and scheduling flow.
- Designed and developed analytics and revenue tracking dashboards using Recharts, enabling creators to visualize business metrics and performance insights. Also contributed to microtransactions, authentication flows, and user profile enhancements for Graphy 2.0.

Application Development Analyst | Accenture | Mumbai (Remote), India

January 2021 - February 2022

- Built Spring Boot services for API data validation and storage; single-handedly migrated 30+ Unix jobs during an Oracle 12c to 19c upgrade.

Education:

Bachelor of Engineering (BE) in Computer Engineering | University of Mumbai, India

2016 - 2020

GPA: 9.4 / 10

Personal Projects:

[Bakin Lane](#), Full-stack e-commerce - React, Express, MongoDB, Razorpay) | [Source Code](#)

[Bakin Gram](#), Social platform - React, Redux Toolkit | [Source Code](#)

Volunteer Experience:

Mentor | [neoG Camp](#) | Mumbai (Remote), India

February 2023 - October 2023

- Guided 50+ students in JavaScript/React interview preparation.
